

(circles) in 6 feet apart in the areas that customers line up

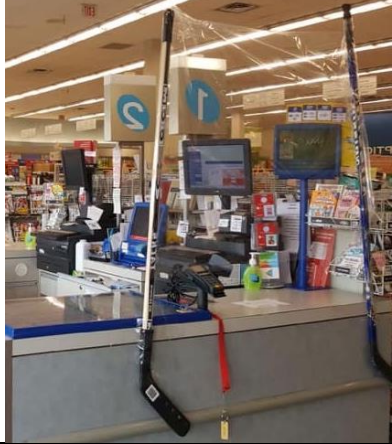

Installing soft plastic screens  
**(Note: plexiglass better solution – there are concerns about how to clean/disinfect the soft plastic and blocking ventilation in the dispensary)**

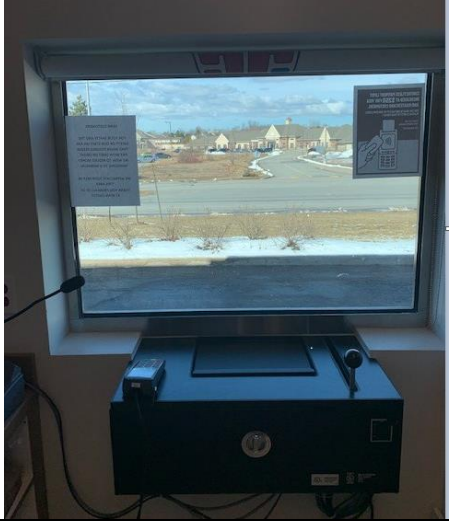

*There Is a study in NEJM suggesting the Covid-19 virus survives at least 72 hrs on plastic surface.*

Install Plexiglass Screens

<p>Consider payment methods. Credit/Debit: increase tap limit if possible.</p> <p>Hand sanitizers and disinfecting products available for cashiers</p>		
<p>Promoting <b>one-way traffic in the aisles</b> to discourage people running into someone coming the other way.</p>		
<p>When helping clients to find product – point to it – do not pick up and hand to them</p> <ul style="list-style-type: none"> <li>➤ Using “reachers” to place product in client’s hands</li> </ul>		
<p>Limit access to the store to small number of clients, i.e. 10 at a time</p>	<p>If resources available, have staff perform active screening at the entrance</p>	
<p>Installing doorbells - example: wireless video doorbell available</p>		

<p>Separate chairs in waiting area so not sitting closer than 6ft. Clean regularly</p>	<p>Disable self service blood pressure machine.</p>	
<p>Providing parking lot/ curbside delivery service</p>		
<p>If available encourage use of drive- thru for pick up of prescriptions and phoned in “front store” orders</p>		
<p>Promoting delivery</p>	<p>Delivery activity has significantly increased. Work with the prescribers and clients to “triage” delivery requests. What is urgent and what can wait a day?</p>	
<p>Consider the services you normally provide. Are there some that can be suspended.</p>	<ul style="list-style-type: none"> <li>• Store Flyers?</li> <li>• Administration of injections?</li> <li>• Collection of expired medications and sharps?</li> <li>• Lottery ticket sales?</li> <li>• Returns of products.?</li> </ul>
